Absolute zero is the lowest limit of the thermodynamic temperature scale, a state at which the enthalpy and entropy of a cooled ideal gas reach their minimum value, taken as zero kelvins. The fundamental particles of nature have minimum vibrational motion, retaining only quantum mechanical, zero-point energy-induced particle motion. The theoretical temperature is determined by extrapolating the ...

Absolute zero, temperature at which a thermodynamic system has the lowest energy. It corresponds to minus 273.15 degrees Celsius and to minus 459.67 degrees Fahrenheit. While all molecular movement does not cease at absolute zero, no energy from that motion is available for transfer to other systems.

[absolute zero | Definition & Facts | Britannica](#)

By international agreement, absolute zero is defined as precisely; 0 K on the Kelvin scale, which is a thermodynamic (absolute) temperature scale; and -273.15 degrees Celsius on the Celsius scale.

[Absolute zero - ScienceDaily](#)

Absolute zero is defined as the point where no more heat can be removed from a system, according to the absolute or thermodynamic temperature scale. This corresponds to zero Kelvin, or minus 273.15

Absolute Zero is the fifth and final upgrade of Path 2 for the Ice Monkey in BT6. Unlike in BT5, Absolute Zero's attacks are based upon the Arctic Wind upgrade instead of Ice Shards. Compared to the Absolute Zero's previous upgrade, Snowstorm, this upgrade comes with a much more powerful freezing ability that freezes and damages all bloon types for a full 15 seconds, a shorter ability cooldown decreased from 60 seconds to 30 seconds, its ability has no initial cooldown, and activating the ...

Absolute zero requires societal change. This will provide opportunities for growth in business, education and research, governance and industrial strategy. To achieve zero emissions we must only pursue the right opportunities and restrain activities which are no longer compatible with a zero emission society.

~~Absolute Zero — UK FIRES~~

The UK government is committed by law to reducing greenhouse gas emissions to ‘net zero’ by 2050. In late 2019, a team of researchers at the Universities of Cambridge, Oxford, Nottingham, Bath and
