[Spring / Summer 2014] New Ancients recognizes the sudden reappearance of history in the work of an emerging group of architects, curators, theorists, and, of course, historians. Drawing a parallel with the 17th-century quarrel between the Ancients and Moderns at the Academie française, guest editors Dora Epstein Jones and Bryony Roberts present the work of practitioners who explore the contemporary possibilities of history. This Spring/Summer 2014 issue particularly emphasizes drawing that synthesizes technology and precedent, including a Piranesi-inspired digital reimaging of Istanbul and an animated analytic drawing of Borromini’s San Carlo alle Quattro Fontane linked via a QR code in the magazine.

Post-traumatic stress disorder is a psychiatric illness that can occur in anyone who has experienced a life-threatening or violent event. The trauma can be due to war, terrorism, torture, natural disasters, violence, or rape. In PTSD the brain areas that are likely to be affected are the hippocampus (memory), amygdala (fear association), the prefrontal cortex (cognitive processing), and the ascending reticular activating system (arousal). The chemical of interest is norepinephrine, which is released during a stressful event and is part of the fight-or-flight response meant to mobilize the body to action.The objective of this title is to outline the neurobiology of post-traumatic stress disorder and provide treatment strategies for clinicians. The chapter material from this book has evolved from a seminar on PTSD held recently under the auspices of the VA Boston Healthcare System, Boston University Medical Center and Harvard Medical School. We propose a book that will focus on the epidemiology, neurobiology, MRI studies, animal models, arousal and sleep issues, clinical trials, and treatment strategies for clinicians. Treatment will cover such topics as guidelines for treating posttraumatic stress disorder, PTSD and the use of mental health services, cognitive intervention therapy, and large scale clinical trials in PTSD. This collection will be a vital source of information to clinicians and neuroscientists.

"The characters Taylor has created for his 4-book series are personable and capable, but they are not super-heroes, and I’m glad they aren’t. I cannot relate to the dangers they face, but I can relate to their feelings about what is happening to them, and can almost feel their panic as they face an unknown future. This book in the series creates a new awakening love in the midst of the horrors of friends dying all around them."
"These people at their core (before clinging to their lives) seem like anyone you may have met at some point in your life, and perhaps you have friends like them. I am quite glad I've never had to face any kind of terror and the horror that these folks endured. Taylor allows the reader to watch how his characters react in circumstances of abject fear and panic and of knowing there is nowhere that is completely safe."

In 2005 the World Bank released a gender assessment of the nation of Jordan, a country that, like many in the Middle East, has undergone dramatic social and gender transformations, in part by encouraging equal access to education for men and women. The resulting demographic picture there—highly educated women who still largely stay at home as mothers and caregivers—prompted the World Bank to label Jordan a “gender paradox.” In Gendered Paradoxes, Fida J. Adely shows that assessment to be a fallacy, taking readers into the rarely seen halls of a Jordanian public school—the al-Khatwa High School for Girls—and revealing the dynamic lives of its students, for whom such trends are far from paradoxical. Through the lives of these students, Adely explores the critical issues young people in Jordan grapple with today: nationalism and national identity, faith and the requisites of pious living, appropriate and respectable gender roles, and progress. In the process she shows the important place of education in Jordan, one less tied to the economic ends of labor and employment that are so emphasized by the rest of the developed world. In showcasing alternative values and the highly capable young women who hold them, Adely raises fundamental questions about what constitutes development, progress, and empowerment—not just for Jordanians, but for the whole world.
