Abstract. The 23 km Green line of the Dubai Metro opened in September 2011, exactly 2 years after the 52 km Red line, making it the world's longest driverless metro. In a city dominated by the car but projecting heavy population growth, the metro has been designed to provide unparalleled levels of customer comfort and finishing, together with the frequency, punctuality and coverage to meet the emirate's future strategic needs and ambitions.

Dubai Metro Building The World S Longest Driverless Metro

The Dubai Metro is a rapid transit rail network in the city of Dubai, United Arab Emirates. The Red Line and Green Line are operational, with one more line being constructed. These first two lines run underground in the city center and on elevated viaducts elsewhere. All trains are fully automated and driverless, and, together with stations, are air conditioned with platform edge doors. Architecture firm Aedas designed the metro's 45 stations, two depots and operational control centers. The AI G

The World or The World Islands, (Arabic: جزر العالم; Juzur al-Ālam) is an archipelago of small artificial islands constructed in the shape of a world map, located in the waters of the Persian Gulf, 4.0 kilometres (2.5 mi) off the coast of Dubai, United Arab Emirates. The World islands are composed mainly of sand dredged from Dubai's shallow coastal waters, and are one of several ...

The World (archipelago) - Wikipedia

The Aedas team thought they had missed out when its developer client in a six way contest failed to win the vast Dubai Metro contract. It was to be the world's largest and most advanced automated passenger transit project in the world, 74 km long, 45 stations, nine of them underground plus two depots and operational control centres.
