Ispe Definition Restricted Access Barrier Systems Rabs

The International Society of Pharmaceutical Engineers (ISPE) has developed a definition of restricted access barrier systems, in collaboration with the US Food and Drug Administration, in order to clear up confusion in the pharmaceutical industry about meeting regulatory requirements for the technology.

Restricted access barrier systems defined

With these improvements, a new name for a truly engineered solution was warranted: restricted access barrier system (RABS). In the early 1990s, industry leaders worked within ISPE to establish a new platform for end users to discuss isolators and advocate for their adoption, which resulted in the formation of the ISPE Barrier Isolator Conference (now the ISPE Aseptic Conference).

RABS: Definitions and Performance Levels. Barrier technology has long been established in the pharmaceutical industry; barriers have ranged from simple screens or demarcation, through RABS (Restricted Access Barrier Systems) to full physical barriers in the form of isolators. Advances in isolator technology have been significant and they are now better specified than ever.

RABS: Definitions and Performance Levels

Restricted Access Barrier Systems (RABS) and isolator systems are two methods of Advanced Aseptic Processing (AAP) that ensure an improved processing environment for cleanroom operations. Knowing some of the key mechanical and operational areas in which the two systems differ will increase awareness of the systems in the industry, and will help create a more detained definition of each.

Advanced Aseptic Processing: RABS and Isolator Operations ...

By Control Engineering Staff October 5, 2005. In cooperation with the U.S. Food and Drug Administration (FDA), ISPE has released a definition paper on restricted access barrier systems (RABS). The paper provides a definition of RABS for the Agency and the pharmaceutical industry. The goal is to reduce confusion about key elements of RABS and their regulatory requirements.

Control Engineering | ISPE releases RABS definition

Isolators and Restricted Access Barrier Systems (RABS) are rigid wall mini-environments that provide a physical and aerodynamic barrier between the operator and the sterile drug manufacturing process enclosed within the interior environment.
