~~Oracle Weblogic 12c for Administrators: A Complete Guide ...~~

A WebLogic Server running the Administration Service is called an Administration Server. The Administration Service provides the central point of control for configuring and monitoring the entire domain. The Administration Server must be running in order to perform any management operation on that domain.

Managed Server. The Admin Server hosts the Administration Console, which is a web application front end used for configuring, monitoring, and managing a domain. You can access the Administration Console with any supported browser that can access the Admin Server. All WebLogic system administration tools and APIs interact with the Admin Server.
